

## **301 KAR 2:225**

### **Dove, wood duck, teal, and other migratory game bird hunting.**

This administrative regulation establishes the requirements for the taking of migratory game birds within reasonable limits and within the frameworks established by 50 C.F.R. Parts 20 and 21.

### **Significant Changes**

This amendment will restrict the take of all migratory birds on WMAs with a wetland management focus to non-toxic shotshells. Previously only doves and waterfowl had been restricted. It also creates an online application process for youth hunters wishing to participate in department-sponsored youth-mentor dove hunts and establishes youth-mentor dove hunting requirements. All these changes are consistent with the long-term Mississippi Flyway and continental management efforts and are within the USFWS required frameworks.
